Hyeonsoo Jang

Researcher, Korea Automotive Technology Institute (KATECH) | hsjang2@katech.re.kr | ORCID 0000-0002-2476-991X

EDUCATION

Gwangju Institute of Science and Technology (GIST) — M.S. in Electrical Engineering and Computer Science **Mar. 2021 – Feb. 2023**

Thesis: Continual Learning for Simultaneous Localization and Mapping
Advisor: Prof. Moongu Jeon
GPA: 4.21 / 4.5

Tech University of Korea (TUK) — B.S. in Electronics Engineering **Mar. 2015 – Feb. 2021**

Thesis: Smart Fire Helmet
Advisor: Prof. Sukhyun Seo
GPA: 4.46 / 4.5 | Valedictorian | Rank: 1st / 1,218 (University)

WORK EXPERIENCE

Korea Automotive Technology Institute **Feb. 2023 – Present**

Data Platform R&D Center, Big Data & AIDV R&D Division, Autonomous Driving Technology R&D Laboratory, Researcher — Aug. 2025 – Present

Big Data & SW Technology Division, Autonomous Driving Technology R&D Laboratory, Researcher — Feb. 2023 – Jul. 2025

ADAS, Integrated Safety Research & Validation; technical consulting for HRC Technology (2026)

RESEARCH PROJECTS

Integrated 5M+ Camera System with Real-time Perception and Recording **Sep. 2026 – Present**

Participating Researcher | Sponsor: Ministry of Trade, Industry and Resources

- Scenario-based vehicle data acquisition

Intelligent Heating Technology Using Multi-modal HMI Based on Nano-heating Film **Sep. 2026 – Present**

Participating Researcher | Sponsor: Ministry of Trade, Industry and Resources

- Synchronized acquisition of RGB, thermal, temperature, humidity and CAN data

Integrated Safety Control and Multi-Stage Seat Belt Control for Enhanced Occupant Safety with Active–Passive Integration **Apr. 2026 – Sep. 2026**

Participating Researcher | Sponsor: Ministry of Trade, Industry and Resources

- Developing prediction models for collision characteristics and crash pulses, and optimization strategies for real-time pre-crash safety applications
- Developing occupant motion monitoring and driver emergency behavior prediction methods for critical scenarios, including sudden braking and Autonomous Emergency Braking (AEB)
- Designing simulation and real-vehicle validation frameworks for integrated safety control systems encompassing ADAS, in-cabin monitoring, and multi-stage seat belt (MSB) control

Development of PMAPS System Validation Technology for 2025 KNCAP **Jun. 2025 – Oct. 2025**

Participating Researcher | Sponsor: Hyundai Motor Company

- Performed KNCAP PMAPS (Pedal Misapplication Prevention System) validation tests
- Configured high-precision sensors and operated vehicle data acquisition systems for black-box testing

Development of a real-vehicle-based pre-crash evaluation method for integrated safety **Feb. 2025 – Present**

Participating Researcher | Sponsor: Hyundai Motor Company

- Developed a real-vehicle data acquisition platform using a GV70 for pre-crash safety evaluation.
- Collected multi-modal data including camera, radar, INS (GPS/IMU), CAN-FD, and RGB/IR in-cabin sensing data
- Developed a ROS 2-based synchronized multi-sensor data acquisition system
- Conducted scenario-based pre-crash experiments in proving ground (PG) environments, including real-vehicle data acquisition and test equipment operation for repeatable crash-relevant safety scenarios

Development of Integrated Controller and Software for Performing Heterogeneous Functions based on Multicore SoC **Sep. 2024 – Present**

Participating Researcher | Sponsor: Ministry of Trade, Industry and Resources

- Defined ADAS performance evaluation specifications for multicore SoC-based integrated controllers, incorporating regulations, safety standards, and NCAP protocols
- Conducting ADAS performance evaluation and analysis using vehicle-based testing in a Proving Ground (PG) environment

Driving Data for Special Road Environments (Advanced) **Jul. 2023 – Dec. 2023**

Participating Researcher | Sponsor: National Information Society Agency (NIA)

- Guidelines on capture methods and procedures for unpaved road driving data

Development of next generation ETC system semiconductor with security function based on electrification **Apr. 2023 – Dec. 2025**

Participating Researcher | Sponsor: Ministry of Trade, Industry and Resources

- Verified Hardware Security Module (HSM) functionality for Electronic Toll Collection (ETC) systems
- Designed automated validation software and test development procedures (TDP)
- Validated cryptographic algorithms including AES-128 and SHA-256

Development of on-site control technology for road traffic network control in the event of an incident or disaster **Feb. 2023 – Dec. 2024**

Participating Researcher | Sponsor: Korean National Police Agency

- Developed traffic coordination strategies for mixed traffic environments involving autonomous and human-driven vehicles
- Developed software for integration with I2V connected validation environments
- Designed evaluation scenarios and test cases to verify the reliability of route coordination models
- Established imitation learning–based route guidance framework for non-autonomous vehicle behavior modeling and autonomous vehicle path planning

Development of MPC5.5(+) ADAS vehicle verification technology **Feb. 2023 – Jul. 2024**

Participating Researcher | Sponsor: LG Electronics

- Designed and executed ADAS validation based on global safety regulations and OEM requirements (NCAP, ISO, UNECE)
- Operated high-precision measurement and in-vehicle sensor instrumentation systems for black-box testing of production ADAS vehicles under proving ground (PG) conditions
- Performed system-level evaluation of ADAS performance in PG environments and established structured validation procedures, including test execution and verification report generation

Development of AI-based robot and service content to support children's reading activities **May 2022 – Dec. 2022**

Participating Researcher | Sponsor: Ministry of Culture, Sports and Tourism

- Contributed to the design of the system framework

HONORS & AWARDS

[A01] Finalist, 2020 Hanium ICT Contest, The Federation of Korean Information Industries — Dec. 2020

[A02] Encouragement Award, Industry–Academia Collaborative Project Presentation, Tech University of Korea — Nov. 2020

[A03] President's Award, 20th Industry–University Cooperation Technology Exhibition, Tech University of Korea — Oct. 2020

[A04] First Prize (1st place), CP-CoP Creative Project Competition, Tech University of Korea — Jul. 2020

[A05] Encouragement Award, CP-CoP Creative Project Competition, Tech University of Korea — Jul. 2019

SKILLS & LANGUAGES

Programming: Python, C, C++, MATLAB

Languages: TEPS 410 / 600 (Jun. 2026)
